

### **Procedure Change for Environmental Improvement Pilot Tests**

As of October 1, 2000 the Air Quality Permitting Program (AQPP) is requiring all applicants applying for permits subject to 7:27-8.9 (Environmental improvement pilot tests) to apply using RADIUS. This change is consistent with the Departments intent to fully process and track all permits in NJEMS, the Department's multi-media environmental database. Applications submitted prior to this date shall continue to be processed using the old format. Applications received on or after this date must be submitted in AIMS/RADIUS format.

Facilities with existing Sub-Chapter 22 Permits (Title V) shall continue to follow the procedures in Sub-Chapter 22 for modifications. Facilities subject to Sub-Chapter 22 but without an issued Title V permit shall continue to follow the requirements of Sub-Chapter 8 until their Sub-Chapter 22 permit is issued.

Applicants with questions regarding this policy should call (609) 292-6716
